

HASOFT®

PROFI sealing foil

FOFR Insulation

Product characteristics

Professional waterproofing SHEET MEMBRANE made of soft polyethylene coated on both sides with a special fleece.

- » Excellent properties for all areas exposed to water
- » developed as contact insulation for installation into adhesive
- » special fleece guarantees high-quality anchoring
- » high flexibility and long service life
- » creates an effective vapour barrier
- » resistant to persistent exposure to acidic solutions down to pH 1.5 and alkali solutions up to pH 13.0
- » creates an effective barrier against radon penetration, resists biodegradation
- » suitable for radiant floor heating
- » ideal for bridging cracks.

FOR INDOOR AND OUTDOOR USE ON WALLS AND FLOORS

Bathroom floor

Details are critical on walls

Shower

Balcony

SIMPLE AND QUICK LAYING INTO A LAYER OF FLEXIBLE ADHESIVE

Sealing system elements are used around the perimeter

SELF-ADHESIVE SEALING TAPE may also be used

Install in a layer of adhesive and overlap the seams by 10 cm

Apply DLAŽBULEP mortar and install tiles

Waterproofing, vapour-proof and radon-blocking membrane made of soft polyethylene, suitable as a contact insulation system and vapour barrier.
